

To Whom It May Concern,

I am a recent subscriber to XM Satellite Radio, and although my experience has been short, I rely heavily on my XM to help me in my business activities. From learning the weather in different cities for travel plans to checking the traffic to make sure I'm not late for a meeting, I use XM to make my day more efficient. I believe since I subscribe to XM for a fee, I am entitled to this service. Please consider my freedom to obtain services I paid for when your are evaluating petition 04-160. I hope you reject this silly petition. Free enterprise is a result of competition, and I believe the NAB might have forgotten this.

Respectfully,
Greg Timpe
